

ATLAS
(Assistive Technology for Learning and Assessment)

A) What is ATLAS?

A modern, interactive, gamified and engaging educational platform that revolutionizes the learning and assessment processes for schools, teachers, and students in Cameroon, Africa and the World.

- ATLAS is primarily tailored towards Computer Science (CS) and Information and Communication Technology (ICT) students at the A and O levels.

B) ATLAS Goals and Vision

1. Revolutionize Education:

Interactive, engaging and scalable learning environment for Cameroonian students (High and Secondary)

2. Empower Teachers:

Dynamic lesson creation, real-time assessments and robust and easy content management.

3. Bridge the Gap between student and technology:

ATLAS will help in bridging the gap between students and technology by providing:

- Solution for limited access to quality educational resources.
- Interactive, gamified and engaging quiz and learning sessions for students. Enhancing student engagement.

C) Existing Competitors:

1. Kawulo: Provides questions with answers for premium subscriptions and little student teacher relationships.
2. Skolarr: Provides questions with answers, little student teacher relationships and an AI assistant bot.
3. Oga Book: Provides questions with answers for premium subscriptions and little student teacher relationships. And also has quiz sessions based on subjects selected by the students.
4. Minesec-DistanceLearning.cm: Provide online-learning (Online classes for people in different locations)
5. Meetlearn.com: Provides just questions (downloadable) with little help on how to get the answer.

D) Competitors Platform Analysis:

1. Platform Specs:

a. Kawulo:

- Provides static, non-editable past questions with answers that may come from some certain teachers after a premium subscription.
- It has a fairly intuitive and user friendly design. But is mainly accessible on mobile devices only!.
- Cannot be tailored towards student's needs, level, experience. It has only a global consideration of students' needs.

- Unique selling point (Via mobile accessibility and possible premium subscriptions by students).
 - b. **Skolarr:**
 - Provides static, non-editable past questions with answers. With an AI assistant chatbot for general purpose use case (Not tailored thoroughly towards the platform or Cameroon GCE syllabus).
 - It has a very intuitive and user friendly design. But is mainly accessible on mobile devices only!.
 - Cannot be tailored towards student's needs, level, experience. It has only a global consideration of students' needs.
 - Unique selling point (Via mobile accessibility and possible premium subscriptions by students).
 - c. **Oga Book:**
 - Provides questions with answers for premium subscriptions and little student teacher relationships. And also has quiz sessions based on subjects selected by the students.
 - It has a fairly intuitive and user friendly design. But is mainly accessible on mobile devices only!.
 - Cannot be tailored towards student's needs, level, experience. It has only a global consideration of students' needs. It has no leaderboards or streaks.
 - Unique selling point (Via mobile accessibility and possible premium subscriptions by students).
 - d. **Minesec-DistanceLearning.cm:**
 - Provides online-learning capabilities for distant learning, assessments but lesser interactivity between peers and tutors.
 - It has a very intuitive and user friendly design. But is mainly accessible on mobile devices only!.
 - Cannot be tailored towards student's needs, level, experience. It has only a global consideration of students' needs. It has no leaderboards or streaks.
 - Unique selling point (Via mobile and web accessibility).
 - e. **Meetlearn.com:**
 - Provides just questions (downloadable) with little help on how to get the answer.
 - It has a very poor design and UX
 - Cannot be tailored towards student's needs, level, experience. It has only a global consideration of students' needs. It has no leaderboards or streaks.
 - Unique selling point (Via Web accessibility only).
2. **Platform SWOT Analysis (Kawulo, skolarr, Oga Book, Minesec-DistanceLearning.cm, Meerlearn.com):**
- a. **Strength:**
 - All platforms have a lot of data about Cameroon past GCE questions and syllabus.
 - All platforms are tailored towards local curriculums.
 - Most of the platforms have some level of user friendly UI and UX.
 - b. **Weaknesses:**

- Limited interactivity or gamified features.
 - Lesser teacher empowerment
 - Lesser interactivity and engagement
 - Lesser administrative empowerment
 - Most of the platforms can't be easily tailored towards a specific student need.
- c. **Opportunities:**
- ATLAS can integrate more interactive and gamified features and tools.
 - Gamification and Dynamic quiz generation or creation by teachers for a specific group of students will improve interactivity and engagement.
- d. **Threads:**
- Minesec and Oga Book both have some degree of interactivity, though not efficient.
3. **Special Case (Tic Summit Portal):**
- This platform has most of the gamified, interactive and engaging features but needs to be tailored towards students, teachers and administrators.

E) Suggested Features:

- Gamification, leaderboards, streaks, daily reminders and enforced peer and teacher interactivity.
- Surveys and Feedbacks based on user UX
- Student, teacher and school interactivity.
- Future expansion and addition of more tools based on user feedback.
- **Offline features** for people with unstable internet accessibility. (This will be very practical on the mobile version).
- Monitor user behavior (Monthly and weekly web site traffic taking note of the number of students, teacher and administrators who visit the site per week or even per days).
- Go into the field regularly and discuss with users about how they see the product. While in disguise, not letting them know we own the product so they don't give us made up responses.

F) Conclusion:

Existing platforms provide local syllabus support or services but no modern interactive, engaging and gamified UX, with little or no user surveys and feedbacks.

Hence, introducing student tailored, local and global syllabus support, interactive, engaging, gamified and aesthetic UI and UX with syllabus and student tailored AI chatbot integration, ATLAS stands out with a different approach to solving student needs in Cameroon, Africa and the World.
